## PROJECTS

### Healthy Heart Blood Bank Management System(PHP MySQL)

A web application acting as a bridge between donor and recipient using PHP and MySQL that features an overall blood bank management system with proper Database Management.

<https://github.com/samyamwho/HealthyHeart>

### Hospital Management System (Python OOP)

Developed an application that enables easier management of patient records, doctor schedules, and appointment booking, with an extended feature for billing and medical history to help increase the efficiency of operations.

### Rescue Route (Flutter)

Designed and developed an Uber-like mobile application for ambulance services, providing quick and efficient access to emergency transportation. The app streamlined ambulance booking and tracking for enhanced response times.

School Website(React)

Designed and developed a responsive website for a school using React, incorporating features like event management, academic resources, and a user-friendly interface to enhance engagement and accessibility for students, parents, and staff.

SKILLS

Technical Skills:

**Programming Languages:** Fluent in Python and C for application development and data processing.

**Data Analysis & Visualization:** Competent in the analysis of data sets and in developing compelling visualizations using R, ggplot2, Python, along with its libraries like Matplotlib and Seaborn.

**UI/UX Design:** Experienced in designing intuitive and visually appealing interfaces to enhance user experience.

**Web Development:** Proficient in dynamic, responsive web development using React, MERN stack, and the latest in web technologies.

**Graphic Designing:** Skilled in Adobe Photoshop on creative design and visual content.

**Content Writing & SEO:** Proficient in writing premium content and using SEO to enhance online presence.

Advanced Microsoft Office skills using Word, Excel, and PowerPoint for effective documentation, data organization, and presentations.

Soft Skills:

**Verbal and Written Communication:** Excellent communication with clear expression in both verbal and written form.

**Critical thinking:** Strong analytical mindset and problem-solving skills for tackling complex challenges.

ACHIEVEMENTS

GETS Examination

Achieved a high score of 87/100, demonstrating strong proficiency and understanding in the assessed subject areas.

TRAINING /CERTIFICATIONS

Getting Started with Enterprise Data Science2024

IBM

Introduction To Machine Learning2023
